

Information Sheet Modular Grow Light 180 - 540 Watt Fixture

LED GROW LIGHTS BY LIGHT EFFICIENT DESIGN

Description:

180 – 540 watt modular grow light system. These fixtures will accept voltage input from 100-277 volts. Many features are incorporated to benefit the grower including:

- 3 Channel light controls allows for 4 modes of operation including Veg / Grow / Flower / All-on.
- Remote Control allows for dimming and programming of the grow lights. (Available as an accessory)
- Daisy Chainable allows multiple lights to use the same power source and program or remote control.
- Multiple band spectrum is well proven for growing.

Wavelength

Applications:

These fixtures are designed for indoor growers. The lights can be used for all phases of growing as they are dimmable, programmable, and have Veg, Grow, Flower and All-on modes. The spectrum includes some UV, Blue, Red and IR. It also has some white to provide a complete spectrum.
