

EASY-TWIST™

Standard & Winged Wire Connectors

EASY-TWIST™ Offering

- **EASY-TWIST™ Standard Type**
has a fixed, precise square wire spring provides secure gripping of conductors. Deep Skirt entry provides protection from flashover and shorts. Compact design ensures proper installation-especially in tight spaces.
- **EASY-TWIST™ Winged Type**
Deep surface ridges and swept-back wing design provides better grip and increased torquing ability. Square wire spring provides secure gripping of conductors. Flame retardant thermoplastic shell provides excellent electrical insulation.
- **EASY-TWIST™ Grounding Winged Type**
Color coded Green for quick identification as a grounding conductor for copper wires only. Specifically designed for making positive ground connections and bonding non-metallic sheathed cable. Live-action square spring draws wires deep into the spring for a safe, tight grip ensuring an excellent connection. Swept-back design makes hand-tightening easy.
- **EASY-TWIST™ N-Type Winged**
Inserted with fixed, square-wire spring grabs wires quickly and firmly. Compact design is perfect for tight spaces. Color coded to industry standards.
- **EASY-TWIST™ High Temperature Type**
Flame retardant UL 94V-2 thermoplastic shell provides excellent electrical insulation. Temperature rating of 150°C. Deep skirt entry provides protection from flash-over and shorts. Threaded funnel entry guides the wires into the connector easily. Pre-twisting is not necessary.
- **EASY-TWIST™ Push-In Type**
Two-blade construction holds wire more securely. In-line construction on all sizes and allows for greater flexibility when fitting into boxes & other tight spaces. Clear construction for visual inspection and integrated test port enables continuity testing.
- **EASY-TWIST™ Ceramic Type**
Ceramic wire connectors are made of high quality ceramics and have excellent electrical and heat resistant properties. Simple one piece design with threads which are molded into the body.
